2. OUR VISION

#THEMOUNTAINISFREEDOM

We believe people need to escape from their daily duty. We believe in the sense of freedom that we all experience in the Mountain, skiing on the slopes and out of them, riding a mountain-bike, flying in the sky with a paragliding or just hiking or running. We believe in the mountains anyone can free his mind and find its way to the top. We believe the Mountain is freedom.

3. THE NEW CABLEWAY

THE POWER OF DETERMINATION.

More than 200 men at work and lots of equipment used. Internationally recognised companies working together with local professionals. Off-season snowfalls and (fortunately) lots of sunshine. Moments of discomfort and others of euphoria. Lots of determination to push through the construction of the facility that looks to the future of the Livigno Mountain Resort.

This wonderful story is told through the images of a video that concentrates all the most important moments in the construction of the new cableway.

ALL THE SENSATIONS OF THE SNOW.

From groomed pistes to the fun parks, Carosello 3000 is a snowy paradise designed both for those who love speed and skill and those who take a more relaxed approach to enjoying the snow.

Livigno resort boasts a massive 120 km of slopes: 26% blue (easy), 57% red (intermediate) and 17% black (hard). In fact, its huge selection of runs is one of the reasons people keep coming back - you'd be hard-pressed to find this much skiing terrain at other resorts.
