

## POWDER 4 FUTURE

*In the last days Livigno has been affected by another snowfall that left 38cm of fresh snow at the top. Exceptionally tomorrow - Saturday March 16<sup>th</sup> - the whole Val Federia will turn into a huge POWDER SLOPE, hence it won't be groomed. Carosello 3000 therefore makes available a vast area where to have fun freeriding in safety and without get far from the ski area.*

We are grateful for these snowfalls which, so far, are abundant and generous. But the climate is changing, and in the future we could not have the winters we have today anymore.

Today is the day "Friday4Future", dedicated to the future of our planet. It's therefore the perfect day to remind us that everyone can make something more, that we don't have to take anything for granted, that with small acts in our daily routine we can re-establish the small balance that runs our climate.

It's a need for everyone to engage personally to preserve what is our beautiful home, the Earth. Because what We do today will ensure to the future generations the opportunity to continue to live amazing outdoor days and to be touched admiring the beauty of the nature. Just like we are doing right now.
